

IDO LEV

Distributed Systems · Cloud-Native Architecture · AI Infrastructure
Tel Aviv, Israel | +972-54-448-5557 | idolev53@gmail.com | [LinkedIn](#) | [GitHub](#)

PROFILE

Backend Engineer and Tech Lead with 4 years of experience building distributed, cloud-native systems, scalable third-party integrations, AI infrastructure, and production backend services. Experienced in designing event-driven architectures and owning features end-to-end, from definition through reliable client delivery. Seeking a challenging backend role to build robust integration layers and optimize complex workflows.

EXPERIENCE

Career Break - Traveling | Jul 2026 – Present

Humanz | Aug 2023 - Jul 2026

Data-driven marketing platform; Humanz Ads powers event-driven paid-campaign execution, real-time data collection, and performance measurement.

Hands-on Backend Tech Lead - Humanz Ads | Dec 2024 – Jul 2026

- **Architecture & Ownership:** Promoted to Tech Lead after proving scalable design abilities with an event-driven custom-events collection system. Architected and built the Humanz Ads platform from scratch, driving scalable backend architecture and technical roadmap for the company's core revenue driver.
- **Integrations & Automation:** Led Meta Ads and external API integrations for campaign execution, attribution, and data sync; cut ad creation from 15 min → 20 sec and approvals from 2 days → 3 sec, contributing to 30% Q1 and 100%+ overall revenue growth.
- **AI Infrastructure & Guardrails:** Built an internal RAG platform using OpenAI API, Elasticsearch Vector Search, and WebSocket streaming - ingestion, embedding, indexing, retrieval, and orchestration pipelines with guardrails for secure SQL execution, permission-aware access, and prompt validation.
- **Event-Driven Architecture:** Architected distributed systems using SNS/SQS, AWS Lambda, and CloudWatch Events triggers for analytics and financial reporting.
- **AI-Powered Operations:** Built an n8n-based AI investigation platform orchestrating log aggregation, database analysis, health checks, and LLM reasoning to automate first-line Ads support investigations.
- **Automation & Monitoring:** Developed notification, automation, and monitoring services with AWS Lambda, CloudWatch, Slack APIs, and database validation.

Backend Developer | Aug 2023 – Dec 2024

- **Backend Services:** Developed Java/Spring Boot services supporting marketing, attribution, and campaign management.
- **Distributed Event Processing:** Engineered end-to-end pixel and custom-event ingestion, validation, routing, aggregation, and storage using AWS, Kubernetes, Elasticsearch, Redis Streams/PubSub, and PostgreSQL.
- **Production Engineering:** Supported Kubernetes production environments and investigated issues via Elasticsearch, Kibana, PostgreSQL, and CloudWatch.

Rapyd | May 2021 – Aug 2023

Global fintech platform building financial infrastructure and payment APIs.

Full Stack Developer | Jan 2023 – Aug 2023

- Transitioned to R&D after independently engineering high-impact internal tools that streamlined NOC operations.
- Built and maintained an internal support platform with Node.js and React, owning the full development lifecycle.

NOC Specialist | May 2021 – Jan 2023

- Monitored large-scale payment systems and coordinated real-time incident response using Elasticsearch and Kibana.

TECH STACK

Languages: Java · Python · TypeScript

Backend: Spring Boot · FastAPI · Node.js · Kafka · Redis Streams/PubSub · Event-Driven Architecture · Distributed Systems

Cloud & Infrastructure: AWS (Lambda, SQS, SNS, EventBridge, S3) · Docker · Kubernetes · Cloud-Native Architecture · n8n

Databases & Observability: PostgreSQL · MongoDB · Elasticsearch · Kibana · CloudWatch

AI Workflows: OpenAI API · RAG · Embeddings · Vector Search · AI Guardrails · Agentic Workflows

EDUCATION

B.Sc. Computer Science - The Academic College of Tel Aviv–Yaffo | 2020 – 2023

PERSONAL PROJECTS

Concerts Trip Planner - travel/concert itinerary builder (Spotify + Songkick + Maps APIs).

Wedding RSVP + Dashboard - automated guest management and notifications for 300+ guests.
